

Church Announcement App

Description: A simple App used to allow announcements to be sent via push notifications.

Requirements:

- Mobile Application developed for both Android and iOS
- Allow for someone to create a user. We can either use a simple username/password or tie it to their phone number.
- A user can create a Church (or group).
- A user can subscribe to a Church.
- Allow notifications to be sent to the Church by the user that set it up.
- Multi-Lingual. Will need to provide menus in English and Spanish.

Note: There are several other apps that do this functionality as part of their offering.
